

Learning Community Program

We believe in the power of trust and collaboration of partnerships to deliver the best-in class solutions for our customers. Solutions that safeguard millions of people, protect properties, helping business run smoothly.

Through the Zenitel Learning Community Program, we passionately share our specialist knowledge and expertise to help our partners deliver best-in class, critical communication solutions.

By being part of our learning community, you will have access to exclusive sales, marketing, and training content to help you enhance your product knowledge, stay ahead of emerging trends, and deepen your understanding of Zenitel's solutions.

**“Together we create a
secure and safer world”**

“Fantastic production. Very professional, far beyond anything else I have seen”

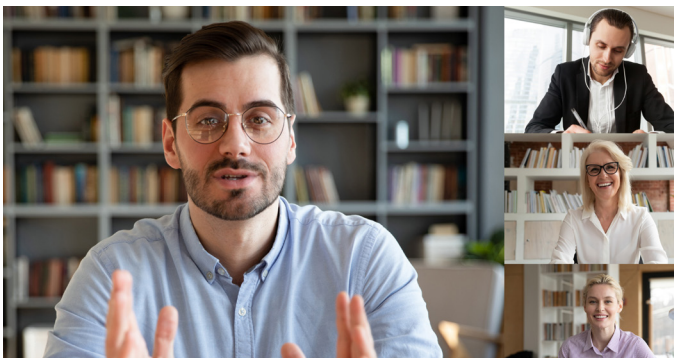

Partizipant Unified Communications - Sales & Technical training Professional, April 2024

Setting you up for success!

Enhance and certify your skillset

We offer a comprehensive range of training services, including classroom trainings, e-learning modules, and certification programs across our entire portfolio. By enrolling we ensure that you'll be at the forefront of innovations that drive the future of communication.

Get access to industry experts via exclusive webinars and events

We bring you to the industry experts, thought leaders, and experienced professionals within the security industry. As a member, you will have an opportunity to interact with hundreds of expert trainers and fellow partners online or in person.

Exclusive sales & marketing tools at your fingertips

As a Zenitel Learning Community member, you will gain the tools and knowledge needed to excel in marketing, selling, and supporting Zenitel products and solutions. We simplify your marketing efforts by providing support across diverse marketing activities.

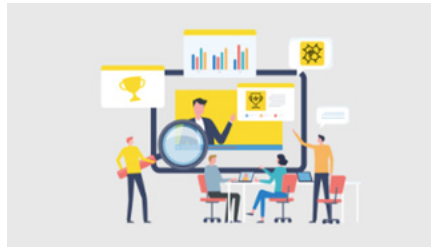

Deliver innovative security solutions together

Zenitel's dedication to improving the efficacy of consultants and specifiers guarantees that customers' expectations are not just fulfilled but exceeded. We ensure architects and engineers have the necessary tools to handle any project by offering access to resources such as A&E Specifications, BIM Objects and CAD Drawings.
